

Capability Narrative

Scorpion Five Technologies (S5T) specializes in engineering secure, containerized, enterprise systems and software that must undergo rigorous accreditation processes.

Past Performance

Key personnel have completed the following, providing architectural design and technical execution in service to the following efforts and products:

- Office of the Under Secretary of Defense for Intelligence & Security (OUSD(I&S)): *Joint Targeting Intelligence Modernization*
- Defense Threat Reduction Agency (DTRA): *Integrated Munitions Effects Assessment - Enterprise*
- Defense Intelligence Agency (DIA) Underground Facilities Analysis Center (UFAC): *Underworld and Discoverable Data*
- Department of the Air Force: *Endgame Framework and AFTES*

Core Competencies

- Cloud-native architectures
- Web services development
- Geographic Information Systems (GIS)
- Containerization on distributed platforms like Kubernetes (K8S)
- Infrastructure and Configuration as Code (IAC/CAC)
- RMF-based systems accreditation
- DevSecOps

Differentiators

- Proven record migrating legacy desktop and monolithic server applications to containerized systems
- Advanced K8S capabilities with Zero-Trust Service Meshes
- Significant experience with DevSecOps, including low-to-high pipelines
- Successfully built advanced cloud-native systems from the ground up *and* accredited them on TS//SCI networks

Corporate Data

UEID: ZX3DHGKX37Q5
 CAGE: 9XKH6
 NAICS: 541511, 541512, 513210, 518210
